GB Instruments™ introduces two exclusive Wire Trackers™, which can trace any installed and unenergized wire or cable. Application specific plugs are built into the transmitter to easily connect to coaxial cables, telephone wiring, Cat 5 data cables, unenergized electrical wiring, or automotive wiring. Distinct warbling tone can be detected from 12 inches away with the small, hand-held receiver. Dual audible and visual indicators on the receiver indicate the location of the cable. Using the sensitivity control allows for precise detection of multiple wires. The compact, integrated design easily snaps together and can be carried on a belt.

### TARGET APPLICATIONS AND INDUSTRIES

Used to trace installed wires and cables, and distinguishes between multiple wire terminations. The industries that may benefit from the Wire Tracker™ are as follows:

- Automotive, Consumer, DVV, Electrical, Electronic, HVAC, Industrial, Marine, and Telecommunications

# WIRE TRACKER™

## UNENERGIZED WIRE TRACER

### FEATURES

- Four transmitter plugs encased in unit
- Detects wires up to 12 inches
- Self-storing
- Self-contained
- Adjustable sensitivity
- Warbling tone
- Auto-Off
- Rubber housing on receiver
- Belt clip

### BENEFITS

- Assortment of plugs suited for different applications
- Traces unshielded wires behind walls, floors, ceilings, etc.
- Receiver stores in transmitter for easy carrying
- Units fit together to avoid losing one piece
- Detects wiring and differentiates wires in close proximity
- Differentiates transmitter signal from other signals
- Transmitter turns off after 30 minutes to conserve battery life
- Soft handling grip, impact resistant
- Convenient, easy carrying on belt
