## *Watergard™ Wire Connectors*

Watergard™ Wire Connectors are designed to excel in above grade, interior/ exterior connections exposed to damp/wet and corrosive environments. Each connector is pre-filled with a long-lasting, 100% silicone sealant that protects your electrical connections from the most severe environments. Not only are these great quality, but they save you time and money! With other connectors, heat shrink, caulk, tape, and other steps are required; with our pre-filled connectors, these costly, time-consuming steps are eliminated giving maximum protection with just a few simple twists. The Watergard™ Wire Connectors save you time, money and energy.

Can Be Used With:

- HVAC systems
- Parking lot lighting
- Pump systems
- Landscape lighting
- Lawn & sprinkler systems
- Car wash controls
- Marine shore power and dock lighting
- Sump and well pump installations

Benefits:

- Easy installation process that saves time
- Eliminates the needs for extra products to weatherproof the item, which saves money
- Thick thermoplastic shell can take a hit from accidental impacts

Features:

- Pre filled with 100% silicone sealant that protects against moisture and corrosion
- Live action square wire spring for secure and long lasting connections
- Designed to exceed the rigorous test stands of UL 486D
