Bundle Boss™

The Perfect Fit Cable Tie Tool

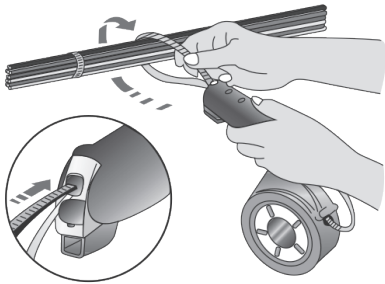

Gardner Bender is pleased to announce the addition of the Bundle Boss tool to our full line of wire management products. This easy-to-use organizing/bundling tool provides the user with the perfect length of cable tie material every time. Bundle Boss is the ideal tool no matter what you want to secure around your home, garage, shop or workplace; this tool bundles it all with no wasted cable tie material.

- Electrical cables
- Garbage bags
- Camping equipment
- Holiday storage
- Luggage
- Magazines/newspapers
- Garden supplies
- Marine or automotive projects

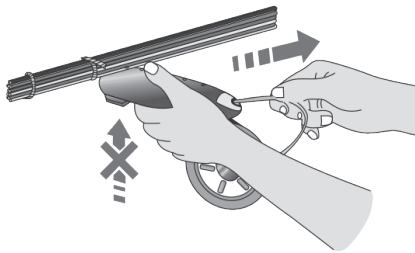

It's as easy as 1... 2... 3!

Simply pull out the length of cable tie needed, wrap it around your bundle, feed it into the locking clip at the front of the tool, pull to tighten, and release the trigger to secure the locking clip - you're done! No more cutting off cable tie tails or connecting cable ties together to get the length you need. Replacement clips and nylon spools are readily available in both black and white material.

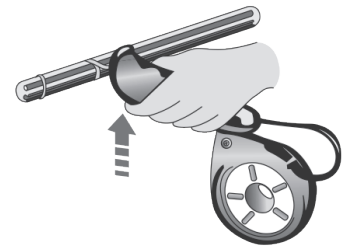

1. WRAP

2. TIGHTEN

3. CLIP & GO
