NEW *Long Nose Wire Strippers*

Multi-function design is six tools in one: Grip, Strip, Crimp, Cut, Form/Loop, and Bolt Cutting. Designed with the electrician in mind, we combined the features of a wire stripper and long nose pliers all into one. The long nose function is great for extended reach, grabbing and looping wire. The straight handle stripper can strip and cut 10-22 AWG stranded and 8-20 AWG solid wire. The curved handle stripper can strip and cut 12-20 AWG stranded and 10-18 AWG solid wire. Both tools also have the capabilities to cut 6-32 and 8-32 bolts, and crimp insulated and non-insulated connectors. Choose between curved or straight handle options, and stop carrying extra tools around with you today!

FEATURES

- Longnose design for forming and looping wires
- Straight and curved serrated jaws for maximum gripping
- Wire cutting and stripping station – stranded and solid wire
- Comfort design grips
- Cuts 6-32 and 8-32 bolts
- Crimps insulated and non-insulated connectors
