## ***Filament Style Non-Conductive Fishtape***

Gardner Bender's series of fish tapes have improved traditional hand fishing with this easy to grip and easy to retract non-conductive fishtape backed by an industry leading 5-Year Limited Warranty. The improved housing design is manufactured to be impact-resistant and exceed the 25ft drop test. Choose the 100 ft. non-conductive filament style fishtape to gently and easily fish and install wire over existing wires or through empty conduit. Its PET tape construction has double the column strength of the competition, making it easier to push through conduit without hang ups - perfect for long runs!

### **FEATURES:**

- Non-conductive tape design – prevents shorting of live conductors
- Combines the strength of steel fish tapes with the flexibility of fiberglass fish tapes
- High stiffness and abrasion resistance for long wire runs
- Wire will not splinter like fiberglass tapes

PET tape construction has over double the column strength of the competition – easier to push through conduit, perfect for long runs!

### Column Strength Test Results

FTP-100R	Top Competitor
6.60 lbs	2.67 lbs

### The Easiest Tape to Fish

- Use the Filament Style Non-Conductive Fishtape to gently fish wire through conduit that already contains cable. The PET tape glides easily to prevent damage.
- Wrap around, easy spin handle and housing provides smooth operation
- Impact modified handle and housing - resists breaking
- At just 1/10 the weight of a traditional fishtape, the FTP-100R is the fishtape of choice for portability and ease of use.
