

# PushGard Connectors

Simple, secure, and easy-to-use alternative to traditional twist-on connectors.

## Great for:

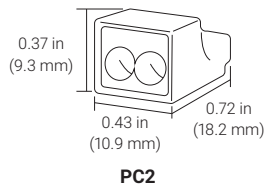

- Remodel Projects
- DIY Projects
- Light Fixtures
- Outlets
- Switches & Dimmer Controls

NVENT GARDNER BENDER PUSHGARD CONNECTORS

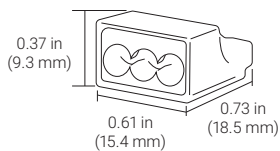

- **Easy to understand:** 2 ports connect 2 wires, 3 ports connect 3 wires etc.
- **Fast installation:** Strip wire and insert into connector; no twisting or taping required
- **Secure connections:** Stainless steel springs firmly grip wires and restrict pull out
- **Confident connections:** Continuity test point for easy voltage checks
- **Simple corrections:** Remove wire from the connector with a left to right twist and pull and rewire.  
Connectors are reusable only with the same or larger wire gauge than previously used. (2,3, & 4 port connectors only)
- **Quick identification:** Clear polycarbonate shells with color coded side panels provide connection verification and identification
- Rated for 600 V max in building wire or 1000 V max in lighting fixtures & luminaires
- Use with Solid & Stranded Copper Wire from #22–#12 AWG depending on model
- UL Listed

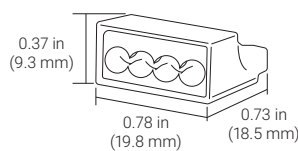

| Ports | Part # | Pkg Qty | Wire Range                       |
